

CSU Chemical and Biological Engineering Graduate Programs

Advanced Polymeric Materials | Bioanalytical Devices | Biomedical Science and Engineering Systems, Synthetic Biology and Biomanufacturing

Research

Our graduate program offers students a broad range of innovative research areas, led by faculty who are world-renowned experts in their respective fields. Opportunities for collaboration with many other departments across the University are abundant, including departments in the colleges of Engineering, Natural Sciences, and Veterinary Medicine and Biomedical Sciences.

PSM program

Our Masters of Biomanufacturing and Biotechnology is a two-year, technical degree program that prepares students with the science and engineering skills necessary to excel in careers, combined with business skills that make them highly effective employees. The program addresses gaps in professional- and master's-level training related to chemical engineering but not fully covered by an undergraduate degree.

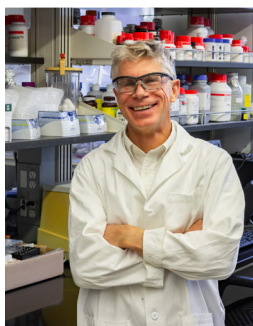

Financial Support

Students on Research Assistantships are paid a competitive stipend and receive tuition support. Students select projects in their area of interest for their research or dissertation. The department has a number of research assistantships, and additional University fellowship awards are available to outstanding applicants.

Fort Collins

Located in Fort Collins, Colorado State is perfectly positioned as a gateway to the Rocky Mountains. With its superb climate, there are exceptional opportunities for outdoor pursuits including hiking, biking, skiing, and rafting.
