

WANT TO SHAPE THE FUTURE?

UNIVERSITY OF TORONTO CHEMICAL ENGINEERING & APPLIED CHEMISTRY GRADUATE STUDIES

#1 in Canada
#26 in the World
2021 QS University
Rankings
in Chemical
Engineering

RESEARCH OPTIONS: DOCTORATE (PhD) or MASTER OF APPLIED SCIENCE (MAsc)

Discover the value of a graduate degree in Chemical Engineering & Applied Chemistry from the University of Toronto – and the impact our students and alumni have on the world around us.

With access to some of the top researchers in chemical engineering and applied chemistry, our graduate students are **shaping the future** in energy, environment, health, and foundational chemistry.

Top applicants will learn more about our Department's community and leading-edge research first-hand at our **Graduate Research Days**, including one-on-one meetings with professors, lab tours and interactive sessions with current students and alumni.

For more information on our MAsc and PhD programs:
uoft.me/chem-MAScPhD

PROFESSIONAL OPTION: MASTER OF ENGINEERING (MEng)

Our MEng program offers advanced professional training in chemical engineering. In just one year of full-time study, you will earn a degree **respected by employers** that differentiates you in a crowded marketplace with specializations in:

- Advanced Manufacturing
- Advanced Water Technologies and Process Design
- Analytics
- Bio-Manufacturing
- Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE)
- Engineering and Globalization (Global)
- Identity, Privacy, and Security
- Soft Materials
