

Pursue your graduate degree at the University of New Mexico. UNM is a stimulating, student-centered, intellectual environment, brought together by forward-looking research. We offer full tuition, health care and competitive stipends for qualified candidates. The CBE faculty are leaders in exploring phenomena on the meso-, micro-, and nanoscales. We offer graduate research projects in biotechnology, biomaterials and biomedical engineering, catalysis and interfacial phenomena; micro engineered materials and self assembled nanostructures; solar energy, batteries, and electrochemistry & membranes. We also offer a coursework only graduate degree that may be completed completely on-line.

The Russell School of Chemical Engineering at The University of Tulsa offers a thesis based master's (M.S.E) and a non-thesis option (M.E), as well as a doctoral degree (Ph.D) program. For information about faculty and their research interests, visit the School's website. Assistantships covering tuition are available for full-time students. Research assistantships are awarded on a competitive basis. For more information on these opportunities, visit the Graduate School website (<https://graduate.utulsa.edu/>).

 Washington University in St. Louis  
JAMES MCKELVEY SCHOOL OF ENGINEERING

Become a leader in cutting-edge research that addresses climate, energy, and sustainable chemical processing while navigating environmental and sustainability challenges.

- » PhD in Energy, Environmental & Chemical Engineering
- » Apply by Dec. 15
