

MISSISSIPPI STATE UNIVERSITY
JAMES WORTH
BAGLEY
COLLEGE OF ENGINEERING

What problem do you want to solve?

Let the Dave C. Swalm School of Chemical Engineering help you with that!

- Alternative Energy
- Biotechnology for Sustainability
- Crystallization & Particulate Processing
- Electron-beam Polymerization
- Energy / Catalysis
- Engineering Education
- Environmental Engineering
- Formation Damage
- Geomechanics & Carbon Sequestration
- Heterogeneous Catalysis for Sustainable Energy & Chemicals
- Hydraulic Fracturing
- Interfacial & Capillary Phenomena
- Interfacial Phenomena
- Microbiology & Biofuels
- Microfluidics

- Molecular Modeling & Simulation
- Nano-composites
- Nanotechnology
- Petroleum Production, Drilling & Exploration
- Photopolymerization
- Pore-scale Modeling
- Pore-scale Physics of Fluid Flow Through Porous Media
- Process Control
- Raman Spectroscopy
- Reaction Engineering
- Renewable Fuels
- Soft Materials
- Soil Remediation
- Sustainable Materials

Now offering M.S. and Ph.D. programs on-campus and online!
